## NOTICE OF INDEPENDENT REVIEW DECISION

**RE: MDR Tracking #: M2-03-0733-01**

\_\_\_ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). \_\_\_' IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to \_\_\_ for independent review in accordance with this Rule.

\_\_\_ has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the \_\_\_ external review panel. This physician is a board certified neurosurgeon. The \_\_\_ physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to \_\_\_ for independent review. In addition, the \_\_\_ physician reviewer certified that the review was performed without bias for or against any party in this case.

### Clinical History

This case concerns a 41 year-old female who sustained a work related injury on \_\_\_. The patient reported that while at work she walked into a walk-in refrigerator, slipped and fell. The patient was initially evaluated in an emergency room. The patient had an MRI and was treated with physical therapy that reportedly aggravated the patient's condition. The patient has also had a myelogram with CT scan following on 3/15/00, EMG studies and discogram 10/23/00. The patient has been treated with conservative modalities and oral pain medications. She has also had epidural steroid injections. The diagnoses for this patient include lumbar disc disease.

### Requested Services

Repeat lumbar MRI.

### Decision

The Carrier's denial of authorization for the requested services is upheld.

### Rationale/Basis for Decision

The \_\_\_ physician reviewer noted that this patient sustained a work related injury on \_\_\_. The \_\_\_ physician reviewer also noted that the patient has been treated with oral pain medications and epidural injections. The \_\_\_ physician reviewer further noted that the patient continued to complain of pain. The \_\_\_ physician reviewer explained that the documentation provided failed

to show evidence of progressive neurologic dysfunction or deficit. The \_\_\_\_ physician reviewer also explained that the documentation provided failed to show evidence of discitis. Therefore, the \_\_\_\_ physician consultant concluded that the repeat lumbar MRI is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
